

Parameters

Electrical Parameters:

Working power	DC15-30V
Power consumption	28mA/DC24V
Output channel	4CH/3A
Maximum output channel current in total	10A
Fuse	8A
TRIAC	25A TRIAC, Minimum Load 40w
Dimming curves	Linear, 1.5 exponent, 2.0 exponent, 3.0 exponent

Environmental Conditions:

Working temperature	-5°-45°C
Working relative humidity	Up to 90%
Storage temperature	-20°-+60°C
Storage relative humidity	Up to 93%

Approved:

CE, RoHS

Product Information:

Dimensions	144×90×66 (mm)
Net weight	715(g)
Housing material	Nylon, PC
Installation	35mm DIN rail installation
Protection rating	IP20
Power cable	AC in: 2.5mm ² -4mm ² Load:1.5mm ² -2.5mm ²
Installation Position	Distribution Box (DB)
Net weight	250(g)
Housing material	Nylon, PC
Installation	35mm DIN rail installation
Installation Position	Distribution box (DB)

PieroNet Cable Guide

CAT5/CAT5E	PieroNet
Brown / Orange	24V DC
Brown white/ Orange white	COM
Blue white/ Green white	DATA-
Blue / Green	DATA+

Installation Steps

- 35mm DIN rail Installation, inside DB Box
- Mark up each output connection cable
- Connect the load and PieroNet
- Check if there is any short circuit in output connection cable
- Check the PieroNet connection, avoid any mistake
- Isolate the high voltage and low voltage cable

Overview

DIM4-L 4-channel 3A Dimmer, supports AC240V and AC110V power input. It has 4 output channels, each channel has a bypass button for manual control. There is fuse protection for each channel, the Dimmer will be protected in case of short circuit. LED indicator will show you which channel has short circuit.

Functions

- 4 Dimming curves, the dimming accuracy is 512 step
- Low, high, max threshold for each channel
- Bypass button for manual control available for each channel
- It is optional setting of choosing a designated scene or back to previous scene when power on again after power off
- Short circuit and over heat protection
- Max 3A of each channel, 8A fuse of each channel for protection (aR type)
- Supports PieroNet Pro online upgrading

Important Notes

- PieroNet cable - 0.8mm single-core copper cable
- PieroNet Connection - Series connection (hand-in-hand)
- AC power - Make sure input AC voltage match with setting in dimmer module
- Connect checking - Check all connection after installation
- Output Channel - Current of each channel can not exceed the prescribed current
- Fuse - The fuse to replace the broken one must be of the same type(aR type)
- Load type - Incandescent light, halogen, LED Light, etc
- The load must be suitable for leading edge dimming
- Make sure the working temperature of the Dimmer does not exceed 50°C

Dimensions and Wiring

DIM4-L

Side view

Indicator for module

Indicator: Flickers when the module is working properly. Keep pressing the indicator for 3 seconds, it turns to red, then user can read and modify the address of the module in the PieroNet Pro set up software.

Safety Precautions

- Fuse must be aR type, and current of each channel can not exceed the prescribed current
- **Turn off the power of Dimmer when replace Fuse**
- (PE) should be connected
- Make sure the working temperature of the Dimmer does not exceed 50°C
- Current in each channel should not exceed 3A
- The screw down strength should not exceed 0.4Nm
- Do not make wrong connection on PieroNet interface, it will damage the PieroNet interface of this module
- Never let liquids get into the module. It will damage this device
- Do not get AC voltage into PieroNet wire, it will damage all devices in the system
- Ensure good ventilation
- Avoid contact with liquids and aggressive gases

Package Contents

- DIM4-L
- Datasheet*1
- PieroNet terminal *1
